

Environmental Guiding Principles

At Centene, we believe environmental stewardship is sound business practice. Our commitment

Guiding Principle 2 Clean

Minimize environmental impacts through responsible consumption of resources.

This principle guides our approach for considering or engaging in:

- x Energy sourcing and operational efficiency opportunities
- x Clean disposal of waste and recycling
- x Conservation of natural resources and support for clean water

Guiding Principle 3 Contribute

Pursue projects that generate beneficial climate and environmental impacts beyond the Centene enterprise

There are many linkages between environmental factors and health outcomes. In addition to the actions we take as a company, we commit to being active in supporting broader efforts to protect the environment and address climate change impacts that benefit the communities we serve and our world

Guiding Principle 4 Commit

We commit to operate in compliance with all applicable federal, state and local environmental requirements.

We commit to continuous improvement of environmental performance.

We commit to consult with internal and external stakeholders on environmental issues and raise their awareness of Centene's environmental policies and impacts, including training for employees

We commit to measure, disclose and regularly report meaningful metrics in accordance with the following environmentally focused standards and frameworks

- x Task Force on Climate-related Financial Disclosures (TCFD)
- x Sustainability Accounting Standards Board (SASB)
